## 1 GENERAL

---

### 1.1 DESCRIPTION

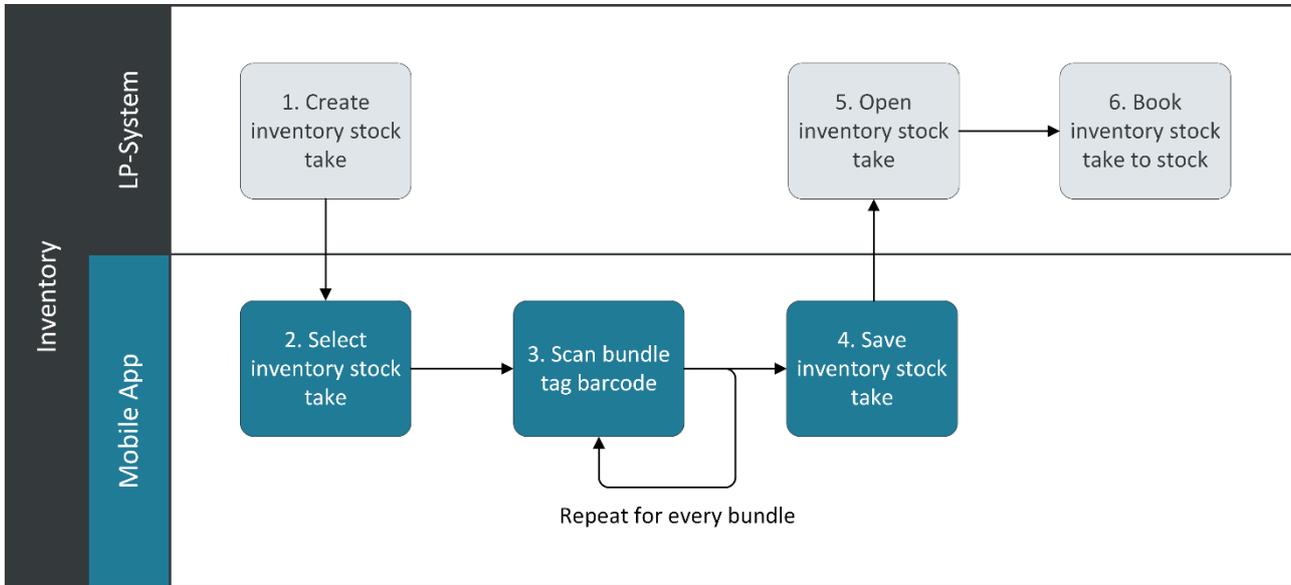

The mobile app "Inventory" was designed to run on a mobile scanner. It allows to record the inventory quantities per bundle.

---

### 1.2 REQUIREMENTS

The mobile app requires a device with either Windows 10 operating system in version 1803 minimum or Android operating system in version 8.0 minimum.

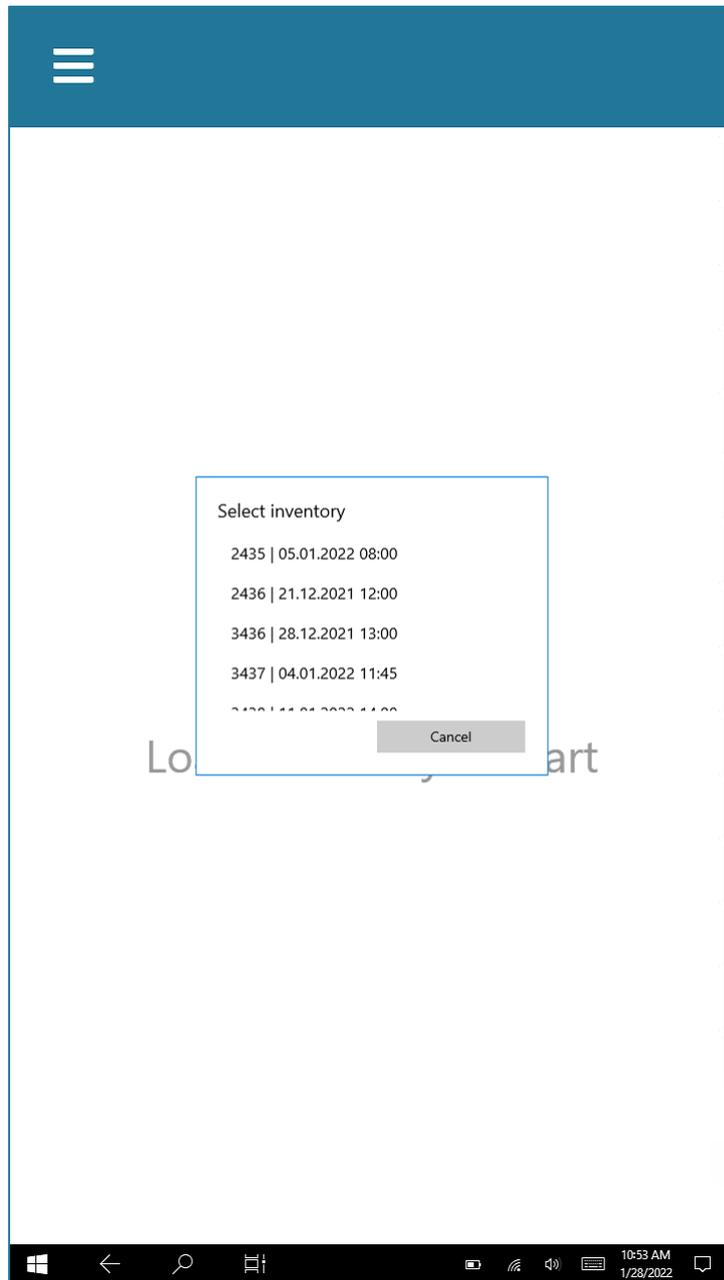

## 2 PROCESS FLOW

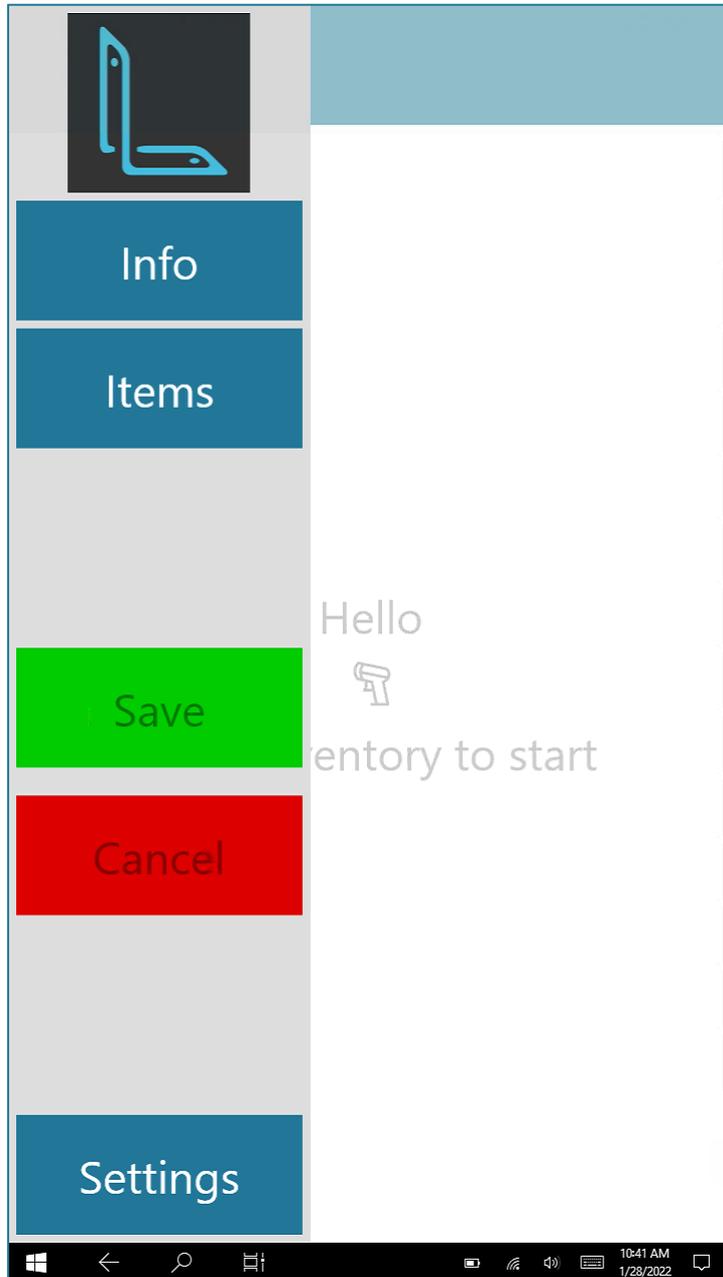

### 3 INVENTORY

#### 3.1 MENU

The following screen will be displayed after starting the application.

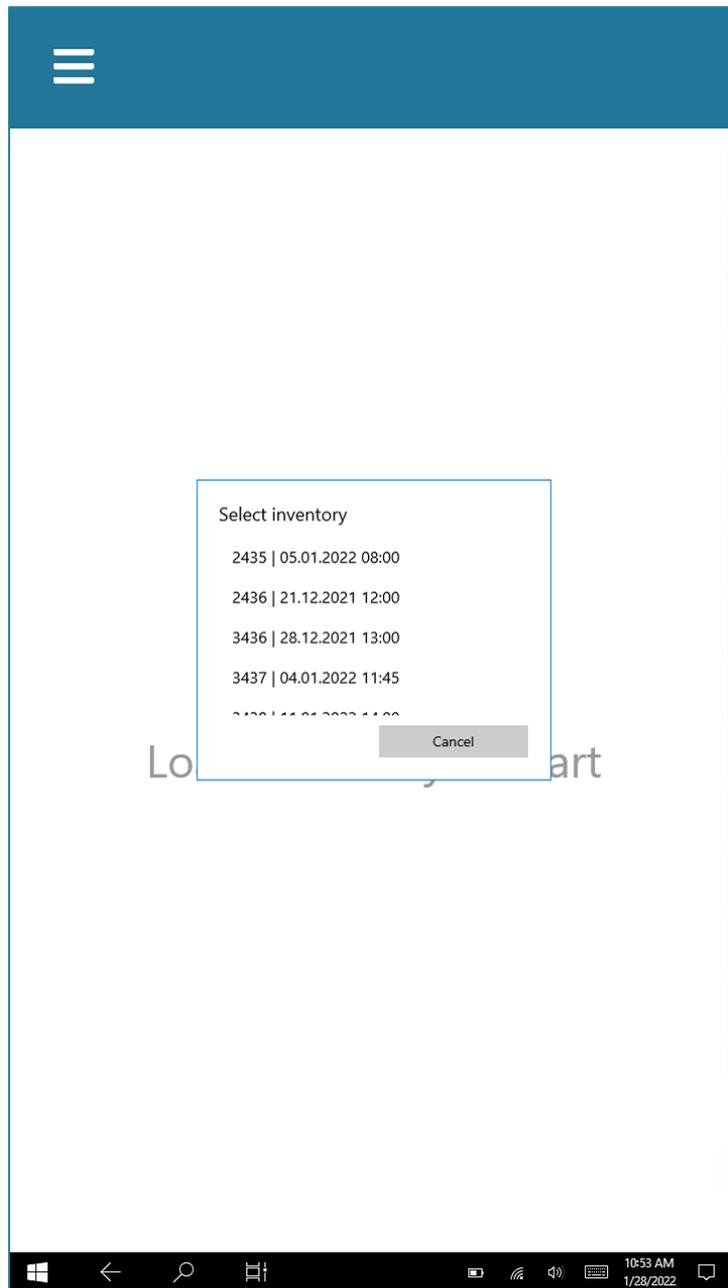

The button on the upper left corner opens the menu.

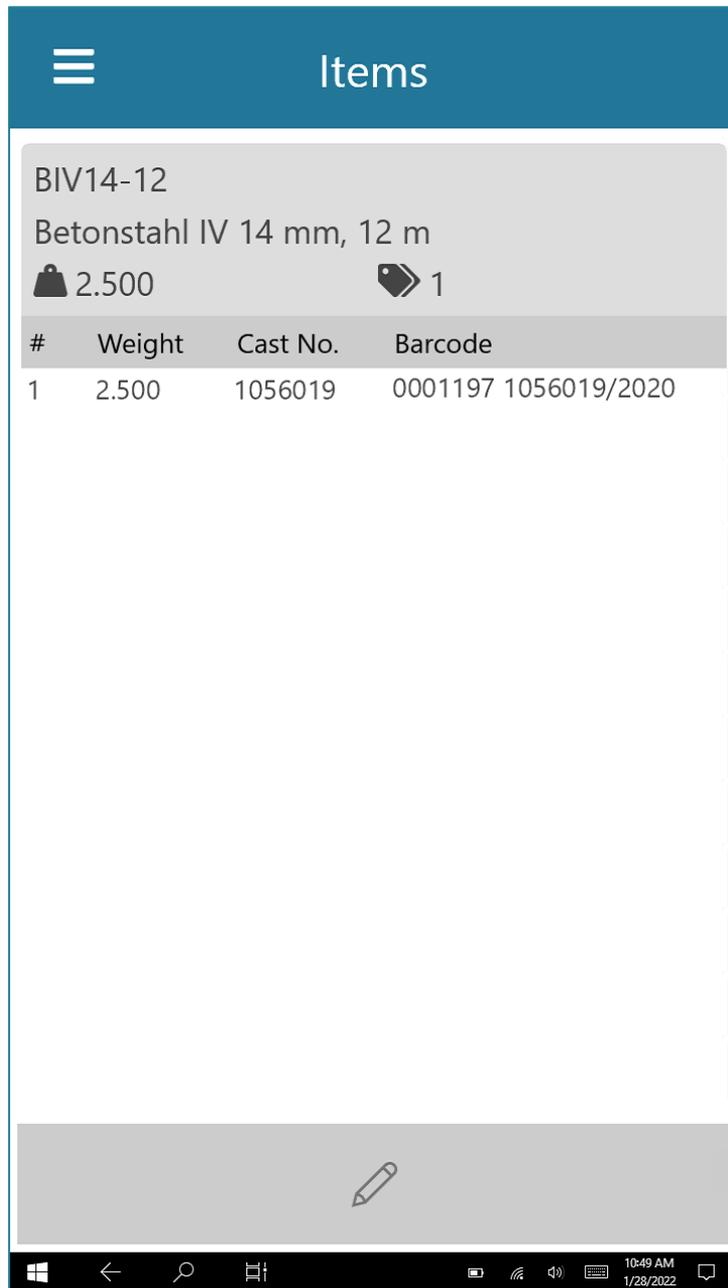

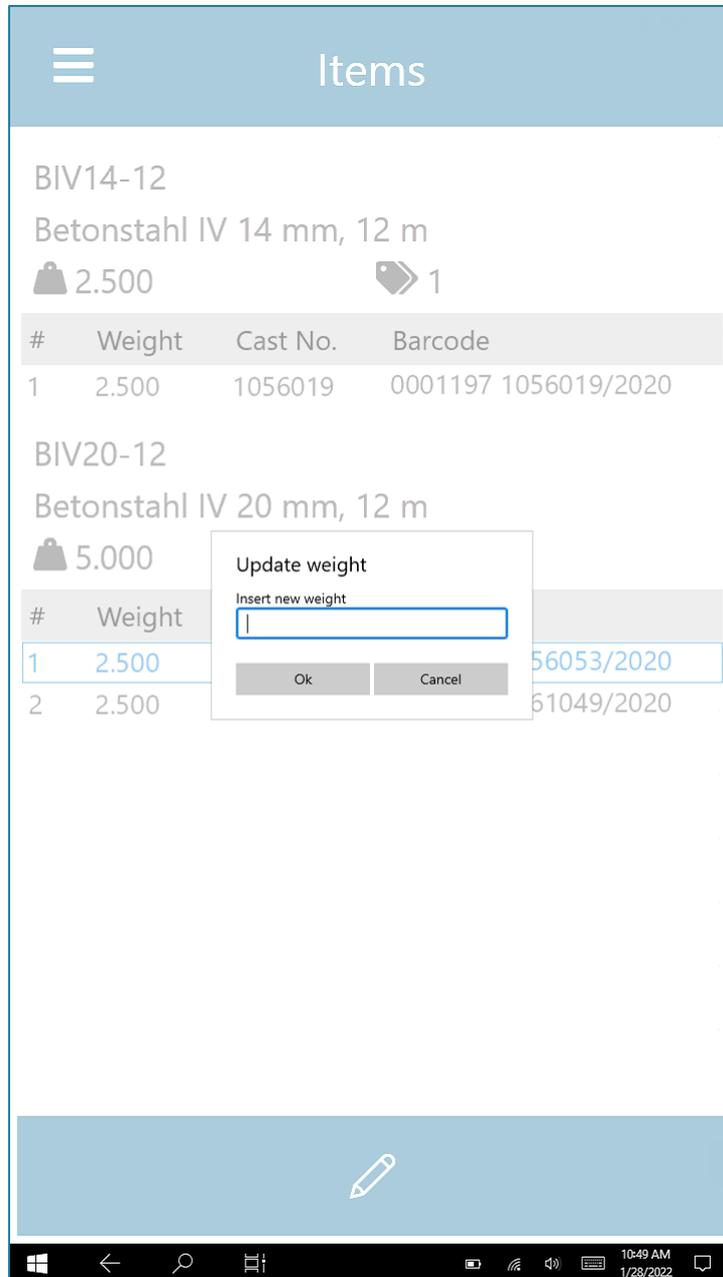

Afterwards, the mobile app can be started on the device. After the start resp. clicking the button "Refresh" a list of all existing inventory stock takes that have not booked yet will be displayed. Select the corresponding inventory by clicking on it.

Now you start to scan the bundle tag barcodes. For each separate product code a new summary line will be added. For each bundle a new bundle line will be added and the corresponding summary line updated.

The bundles are automatically taken over with their entry weight. If this weight has to be changed, you can select the corresponding bundle and click the Edit button below.

Has the recording of the inventory quantities finished click the button "Save".

Now the inventory stock take with ist quantities can be displayed in LP-SYSTEM.

Input of inventory balance

Counted Quantities | Cast numbers (Bundles) | Korrektur

Inventory date: 27.05.2020  
 Checking time: 09:00  
 Booking date:

Input stock location  
 with prices  
 Only price correction  
 Stock specific stocktaking  
 With length entering

Product code	Description 1	Stock balance	Inventory quanti	Unit quantity	Stocktaking diffe	Value
BIV08	Betonstahl IV 8 mm		4,103	to		
Q188AN	BSTG Q188A		36,307	St		
Sum:	Stahl		4,103	to		
Sum:	Lama		36,307	St		

On the tab "Cast numbers" you can check the recorded bundles and cast numbers.

#### 4 CONFIGURATION OF THE MOBILE APP

Click on the menu entry "settings" to configure the application. In the settings you can choose the application language.
